TSP/TSPC DIN-Rail Battery Controller Modules

All modules provide a professional battery control function to charge and monitor external lead-acid batteries. These are to build professional DC-UPS systems using TSP and TSP-WR series power supplies.

- Battery protection against over-voltage, deep discharge, short circuit and reverse connection
- Remote On/Off for battery and power supply
- Alarm outputs for input, output and battery condition
- Controlled end of charge voltage by external battery temperature sensor

TSPC 240UPS

24 VDC / 240 W power supply with integrated battery controller

TSP-BCMU360

Universal battery controller module,
24 / 48 VDC step up from 12 V batteries

TSP-BCM

Battery controller modules for TSP power supplies,
for 12, 24 and 48 VDC output voltage systems
